

GaBi Software
PRODUCT SUSTAINABILITY

Improving Product and Process Sustainability by using the GaBi software & database suite

Harald Florin and Annette Koehler, PE INTERNATIONAL

Are you pressed by rising demands from customers and regulators for improved environmental performance? These and the increasing push for transparency is driving a surge in Life Cycle Assessment (LCA). GaBi LCA Software incites unprecedented innovation to improve environmental performance not merely shifting the burden resulting in unintended consequences.

With an understanding of the impacts of its products and by talking about improvements effectively, a company can enhance its brand and be perceived as leader in its industry.

This seminar will introduce how the GaBi software is supporting water management and how to get on the fast lane from LCA to Ecodesign. You will learn about the up-coming GaBi 5 and enjoy a platform for exchange and discussion with international LCA experts.

- GaBi Software and water management
- From product LCA to rapid Ecodesign prototyping
- Preview on GaBi 5 and related databases
- Exchange & discussion

Participation: There is a limit on participants of 50 on a first come, first serve basis. Please reserve your seat by sending an email to a.kuprevich@pe-international.com

Cost: free
